

Classification of Arrhythmia by Using Deep Learning with 2-D ECG Spectral Image Representation

Prior Knowledge

Date	17 November 2022
Team ID	PNT2022TMID16055
Project Name	Classification Of Arrhythmia By Using Deep Learning With 2-D ECG Spectral Image Representation

One should have knowledge on the following Concepts :

Supervised and unsupervised learning:

Regression Classification and Clustering :

Machine Learning in R - Classification, ...
